## COURSEWORK

OOP / Advanced OOP

Web Programming

Data Structures & Algorithms

Design & Analysis of Algo

Java Programming

Operating Systems

Bash Tools and Scripting

Digital Marketing

Functional Programming

Database Management Systems

Artificial Intelligence / ML

Programming in C++

Soft. Project Mgmt

Computer Graphics

Compiler Construction

Digital Logic Design

Computer Networks

Information Security

## SKILLS

### PROGRAMMING

Over 20000 lines:

• React • Next JS • Solidity

• Typescript • JavaScript

Over 5000 lines:

• C++ • Java • HTML

• CSS3 • MongoDB

• Tailwind CSS

Over 1000 lines:

• SCSS • PHP • Assembly Language

(8086) • MySQL • Bash

Familiar With:

• Blockchain • Ethereum

• Metamask • Ganache • Sepolia

• Cryptography • Cloud Services

## EXPERIENCE

### SEMICOLON – SOFTWARE COMPANY | FULL STACK DEVELOPER INTERN

July 2025 - Present | Islamabad, PK

- Working as a Full Stack Developer Intern at **Semicolon**, contributing to real-world projects during a 2-month internship (July–August 2025) with performance-based evaluations , Working on React.js and Next.js projects

### HUMAN CARE FOUNDATION | REACT JS WEB DEVELOPER

Mar 2024 - Sep-2024 | IBD, PK

- Developing a React-based website, created modular components, integrated APIs, ensured responsiveness, and collaborated with teams to launch a user-friendly and visually appealing site that improved online engagement.

### CODEALPHA | FRONT END WEB DEVELOPER INTERN - REMOTE

Nov 2023 - Dec-2023 | Delhi, IN

- Designed and implemented front-end features for web applications using React, enhancing user experience with intuitive interfaces & Contributed to project planning, managed state and routing, and integrated MySQL for database interactions while learning basic PHP for server-side scripting.

### INTERNS PAKISTAN | FRONT END WEB DEVELOPER INTERN - REMOTE

Oct 2023 - Nov 2023 | Islamabad, PK

- Developed responsive web pages using HTML, CSS, and JavaScript, and collaborated with teams to implement dynamic content using jQuery.
- Assisted in debugging, troubleshooting, and version control management using GitHub.

## PROJECTS

### Point of Sale - Inventory Management System | JAVA DESKTOP APP.

NUML UNIVERSITY | Islamabad, PK

It was a solo project and I worked on this project in Java Programming language. the tool I was using for the project was NetBeans.

- Developed a Java-based POS and Inventory Management System with roles for Admin and Cashier, using MySQL and MS Access for data storage.

### React Website | REACT

- Built a static React website with multiple pages accessible via React Router and reusable components for consistent UI/UX.
- Ensured responsive design compatibility across various devices and screen sizes.
